INTRODUCTION

This directory lists current Detroit Diesel Corporation (DDC) authorized distributors and on-highway service dealers in the United States and Canada.

The listings shown in bold type represent Distributor headquarters and Branch locations. Distributors specialize in servicing Detroit Diesel engines in a variety of on-highway applications. They have the necessary facilities, experienced personnel and parts inventory to handle the full range of engine service from maintenance to overhaul. This is designated by "Full Service" preceding the listing of product codes.

The outlets shown in standard type are authorized service dealers and have been classified to perform as either maintenance or overhaul dealers.

Maintenance Dealer Classifications

Sales and sales promotion of products and parts as well as minor service performed on easily accessible components and parts on products. This level of service includes the following types of activities: Inspections, tune-ups, adjustments, troubleshooting (warranty reimbursement limited to two(2) hours), replacement of seals (front and rear crankshaft seals and accessory drive seal only), gaskets (rocker cover, oil pan and oil cooler gaskets only), injectors, rocker arms, jake brakes, fuel pump, water pump, turbocharger, air compressor, electrical system components, complete engine assemblies and other work not requiring major product disassembly. Repairs involving camshaft, front cover, cylinder head, flywheel housing or rod and main bearing removal are not permitted..

Overhaul Dealer Classifications

Maintenance Dealer Operations as well as major repair or overhaul work performed on all components and parts of products. This level of service includes performance of the following types of activities: replacement of individual internal parts, assemblies or subassemblies, overhaul of internal assemblies or subassemblies and overhaul of complete engine.

Products Serviced

This directory provides a listing which indicates the product responsibilities of the service outlet.

Authorized dealers display a standard Detroit Diesel product sign on their premises. This sign indicates only that they have been appointed as an authorized service dealer for one or more specific Detroit Diesel products and is not meant to imply that they necessarily are qualified to service all Detroit Diesel products.

Road Service in the U.S. or Canada

If you require road service for any reason in the U.S. or Canada, you may call the **1 800 445 1980** customer assistance phone number. An operator will assist you in determining what type of service is required. Not all problems are engine related and not all problems are covered by engine or vehicle warranties. *YOU MAY BE RESPONSIBLE FOR REPAIR EXPENSES.*

Before calling Customer Assistance, please do the following:

- Check coolant level
- Check fuel level
- Check DDEC fuses
- Check for fuel leaks
- Make sure manual shutoff valve (if installed) on the fuel filter adaptor, fuel processor body or fuel supply line is open.
- Check the oil level on the dipstick.
- Check diagnostic codes.

If you call, have the following information available:

- Engine serial number
- Truck, bus or equipment make and model

- Odometer mileage (kilometers) or hourmeter hours
- Truck, bus or equipment owner/company name

Working with DDC Service Outlets

As the owner of a Detroit Diesel product you have a complete network of over 1,200 Detroit Diesel service outlets in the U.S. and Canada, plus many outlets worldwide that are prepared to meet your parts and service needs:

- Service by trained personnel.
- Sales team to help determine your specific power requirements.
- In many areas, emergency service 24 hours a day.
- Complete parts support, including reliabilt® remanufactured components.
- Product information and literature.

Despite the best intentions of everyone concerned, misunderstandings may occur. Normally, any situation that arises in connection with the sale, operation or service of your product will be handled by the authorized service outlet in your area.

In the U.S. and Canada, check the Yellow Pages or service locator at www.detroitdiesel.com for the Detroit Diesel service outlet nearest you.

To further assure your complete satisfaction, we have developed the following procedure to use if you have a problem that has not been handled satisfactorily.

Step One

Discuss your problem with a member of management from the authorized service outlet. Frequently, complaints are the result of a breakdown in communication and can quickly be resolved by a member of management.

If you have already discussed the problem with the Sales or Service Manager, contact the General Manager. If your complaint originates with a dealer, explain the matter to a management member of the distributorship with whom the dealer has a service agreement.

Step Two

When it appears that your problem cannot be readily resolved at the distributor level without additional assistance, contact the Detroit Diesel Regional Product Support Manager or Operations Manager responsible for your local service outlet. You will be assisted by a member of the manager's staff, depending upon the nature of your problem.

Prior to this contact, have the following information available:

- Engine model* _____.
- Engine serial number* _____.
- Type and make of equipment.
- Engine delivery date and accumulated miles or hours of operation.
- Nature of problem.
- Chronological summary of engine's history.
- Name and location of authorized service outlet.

***Important:** Your engine model number and serial number should be written on the lines provided. They will identify your engine and all service parts, plus provide warranty and extended coverage information.

Step Three

If you are still not satisfied, present the entire matter in writing or by phone to:

Sr. Vice President, Customer Assurance, Parts, Service and Customer Support

Detroit Diesel Corporation
13400 Outer Drive, West
Detroit, MI 48239-4001
Phone: 313-592-5000
Fax: 313-592-7244

Ultimately your problem will likely be resolved at the distributorship or dealership, utilizing their facilities, equipment, and personnel. Therefore, it is suggested that you follow the above steps in sequence when experiencing a problem.
